

# Replacement Notes for : Screw Terminal (various)

## Installations Notes:

Screw terminal ballasts of various manufacturers similar to picture at left, are replaced by the FA100 ballast using adapter harnesses 3-3IN-H for the input and 8-8OUT-H for the output as pictured below. This style of replacement may be the easiest for equipment that has had multiple ballast types and various types of splicing and repairs over the years.

Typical Applications:  
(various)
